-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains legal terms such as "comprising". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8, and 9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tracy '204 or Borzachillo.

Tracy '204 or Borzachillo discloses an aircraft having a fuselage, control system or systems, thin supersonic wings with low sweep angularity and low torsional stiffness, trailing

Art Unit: 3644

edge flaps that are configured to provide flap deflection to simultaneously control wing twist and to reduce drag when the aircraft is in the subsonic flight conditions.

Re claims 3, 4, and 5, please note that due to the shapes of the wings in Tracy '204 and Borzachillo inherently discloses the center of pressure and torsional elastic center. When the flaps are moved during certain flight conditions, the center of pressure and torsional elastic center moved with respect to each other.

Re claim 6, please note that the flaps of Tracy '204 or Borzachillo provide camber acting.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tracy '204 or Borzachillo as applied to claim 1 above, and further in view of Tulinius.

Tracy '204 or Borzachillo discloses all claimed parts except for the means to monitor wing twist. However, Tulinius discloses that means to monitor wing twists are well known in the art.

It would have been obvious to one skilled in the art to have used a means to monitor wing twists in Tracy '204 or Borzachillo's system as taught by Tulinius to provide closed loop feedback and to allow the aircraft to fly efficiently.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3644

Tracy '076, Ornberg, Leidy et al, and Hollowell et al disclose aircraft means.
